

Diesel and LPG Forklift Trucks Capacity 4000 – 5000 kg H 40, H 45, H 50

SERIES 394

Safety

Linde ProtectorFrame: Overhead guard and frame form a structural unit, resulting in maximum stability and safety. Top-mounted tilt jacks allow use of slim mast upright sections for optimum visibility.

Performance

Advanced engine and drive technology combined with the original Linde Load Control system enables the operator to use the truck's vast potential to maximise productivity. Comfortable and precise fingertip control of all mast functions.

Comfort

Linde brings to this forklift a generously sized automobile-class workspace. Designed to the most advanced ergonomic standards. Spacious cab interior, adjustable armrest, suspension seat and functional positioning of easy-actuation controls: basic to fast, stress-free working.

Reliability

Proven in tough sustained operation. Isolation of the cab from the mast, drive axle and chassis results in reduced shock and vibration. Maintenance-free mounting of axles and tilt jacks cuts downtime and operating costs.

Productivity

Effective and cost-efficient at work: The original Linde hydrostatic drive cost does away with gearshift, clutch, differential and drum brakes. As a result, servicing costs are low, truck uptime is high and productivity is enhanced.
