

# Approved Trucks

# MAKE IT YOURS

Approved Trucks from Linde Material Handling

The Linde Approved Truck formula: remanufactured vehicles + customer packages = high-quality individual solutions

# EFFICIENT, CUSTOMIZED, SUSTAINABLE

## Truck solutions tailored to your needs

A Linde Approved Truck is a solution that is as high-performing as it is cost-efficient. It offers you the flexibility and affordability to run your operations efficiently and stay ahead of the competition. But there is more to it: Not only do you get a truck remanufactured to the highest quality standards, you can also customize it to meet your individual needs.

The Linde Approved Trucks program offers a unique way to equip an Approved Truck according to the specific requirements of your application at a competitive price. To make this simple, we have put together a modular set of customer packages – each of them geared to a particular application or service aspect.

As a result, just three steps will take you to your very own Linde Approved Truck:

1. Choose your truck from an extensive stock of remanufactured Linde trucks.
2. Order the set of customer packages you require.
3. Have your Approved Truck delivered to your doorstep in a short period of time.

The Linde Approved Trucks program is therefore setting standards in terms of the performance, quality and sustainability of remanufactured trucks.

All Approved Trucks and all technical components of the customer packages are qualified for all service levels offered by Linde Material Handling. This also includes an optional warranty of up to 12 months.

## FIVE BENEFITS FOR YOU

### QUALITY

#### The new standard for Approved Trucks

We remanufacture all trucks in dedicated refurbishment centers all over Europe based on a standardized process and according to high-quality regulations. Each vehicle is disassembled and then all parts are checked, repaired or exchanged. This ensures that any trucks you order will always meet the highest quality standards.

### SUSTAINABILITY

#### A responsible solution

Your decision for an Approved Truck by Linde contributes to a responsible use of resources. Remanufacturing reduces the overall quantity of raw materials consumed and lowers the ecological footprint of the product significantly. Our standardized remanufacturing process increases lifetime efficiency and satisfies the highest environmental and safety standards.

### CUSTOMIZATION

#### Mix and match

Safety, ergonomics and energy consumption are decisive factors for increasing the efficiency and productivity of your operations. Our Approved Trucks enable you to mix and match from a large number of modular packages to improve key features of your truck. The packages are based on state-of-the-art Linde technology also applied in the latest truck models.

### PERFORMANCE

#### It's a Linde

Our Approved Trucks live up to the core values of the Linde brand such as performance, efficiency, user-friendliness, versatility and reliability. We refurbish all Approved Trucks based on the same rigorous standards that apply to every Linde truck. This ensures a strong performance in any environment – be it as a stand-alone solution or as part of a larger fleet.

### AVAILABILITY

#### Quick and easy

Approved Trucks give you the choice to buy a truck the moment you need it. You can choose your Approved Truck from a wide range of models and customize it. Since we always have a large number of trucks in stock, we can swiftly configure your order and deliver it to your location at a time that suits you.

# HIGHEST QUALITY THROUGHOUT THE WHOLE TRUCK LIFE CYCLE

## Our remanufacturing process

The basis of our Approved Trucks program is a standardized process that guarantees a high-quality standard from end to end. Before it can enter the program every truck is strictly pre-selected from our own rental fleets and leasing returns and undergoes our inspection process. Only those trucks which meet predefined criteria are selected and transferred to dedicated remanufacturing centers all over Europe. There the trucks are inspected, maintenance requirements identified, and the process of disassembly begins. All key functional, technical and safety related tasks are checked, the motors and batteries are examined and where necessary renewed in accordance with Approved Truck standards. As part of the reassembly process all components are cleaned and resprayed so your Approved truck looks like new.

## CONSISTENT QUALITY STANDARDS

Every Approved Truck is remanufactured in a seven-step process to ensure that all trucks reach the same high quality standard. This is based on a set of predefined criteria, such as performance, wear and tear and capacity. As part of this process all core components are checked for compliance with Approved Truck standards and remanufactured or replaced with new genuine parts.

## SUSTAINABLE IN EVERY WAY

Remanufacturing is an inherently sustainable process. It extends the life cycle of a truck and, as a result, makes optimal use of resources. The standardized Approved Trucks remanufacturing process guarantees that the use of material, fuels and liquids as well as waste disposal and recycling are completed according to the highest environmental, health and safety standards.

## SHORT DELIVERY TIMES

After the remanufacturing process all Approved Trucks are stored in dedicated locations and are ready-to-go. This means you benefit from short delivery times. When you place your order, you can either choose a standard-configuration truck from stock or customize a truck to your specifications.

# THE WAY TO MAKE IT YOURS

## Our modular packages

Whether you are looking to replace a single truck or to add several vehicles to a fleet, Linde Approved Trucks offer various possibilities for adapting trucks to your operation, maintaining the same technical standards and ensuring the connectivity across your fleet. Each package includes a defined set of features and retrofit components to achieve this. Thanks to the modularity of the packages you can improve single aspects such as safety, ergonomics and energy consumption or combine two or more packages. The packages share the state-of-the-art technology of the latest Linde trucks.

### Safety Pack

Improve the safety of your employees and reduce damage to trucks and goods.

### Lighting Pack

Improve the lighting conditions of your operations with an additional set of working lamps.

### Wear Pack

Further enhance the lifetime of your Approved Truck by adding new parts.

### Driver Pack

Create an optimal driver experience with a completely renewed workstation.

### Energy Pack

Increase the energy efficiency of your Approved Truck with a new traction battery.

### Color Pack

Choose an individual color for your truck to match your corporate design or differentiate your fleet.

### Preventive Service Contract Pack

Minimize downtimes and unexpected repair costs with preventive maintenance on a regular basis.

### Full-Service Contract Pack

Protect your truck and ensure maximum availability with controlled budgets, thanks to our full service contract.

### Energy Service Pack

Benefit from a full-service contract for your energy system to ensure long-term efficiency.

### Extended Warranty Pack

Increase your guarantee period to 12 months or 1,000 operating hours.
